

Better traction can mean better performance of your skid steer loader. Surfaces made slippery due to sand, snow, mud and rain may mean challenges, but not excuses. Tracks from CEA provide protection and reduce tire wear in abrasive conditions.

Grouser Crossbar Tracks

Increase traction and flotation in soft, muddy conditions and reduce ground pressure by as much as 50%. Features include 1-1/4" hardened field-replaceable bushings and a link design with 50% deeper end wear areas for longer endurance and operation. Crossbars and traction bars are induction hardened for greater durability and performance. Tracks are available to fit tires from 8.5" (216 mm) to 14" (356 mm).

Grouser Hard Pad Tracks

The best performing tracks used in sandy soil, these tracks offer 5" wide pads for improved floatation, reduce ground pressure by as much as 50%, protect your tires and reduce tire wear in abrasive conditions. Features include 1-1/4" hardened field-replaceable bushings, and easy installation. Contractor-grade, heavy duty components with two built-in traction bars improve track-to-tire grip and easily withstand continued operation on hard surfaces. Fits skid steers with tires 10" (254 mm) and 12" (305 mm) wide.

Grouser Soft Pad Tracks

Have replaceable non-marking shoes designed to prevent marring on hard surfaces such as concrete or asphalt, and also perform well in adverse conditions such as mud or sand. The soft shoes on these tracks are bolt-on and replaceable and reduce ground pressure by as much as 50%. Design is easy on the tires and provides strength and tire protection. Available for most skid steers with tires 10" (254 mm) and 12" (305 mm) wide.
