

VANGUARD DQ-1 Drum Lifter

Operating Instructions

Description

- The VANGUARD Top Lift DQ-1 Series Drum Lifter Attachment utilize heavy-duty single automatic clamping mechanisms for handling steel, plastic or fiber drums in high volume applications. The clamping mechanisms are completely mechanical, requiring no hydraulic or electrical connections to the lift truck

Step 1

- Simply slide the forks of the lift-truck into the fork pockets of the attachment. The safety chain should be attached to the lift-truck prior to using the equipment

Step 2

- With mast tilted slightly forward, center attachment with center of drum. Drive truck forward until attachment contacts drum and presses inner housings back into the outer housings. Raise carriage and drum will be engaged and ready for transporting

Step 3

- Drum disengagement is accomplished by tilting the mast forward, then lowering the carriage until the jaws have retracted completely. Truck operator can now back away to engage another drum.
